

I and my Husband are XM Radio listeners. We travel alot and appreciate the traffic and weather information that we get an areas where we otherwise would not be able to get any radio at all, and in other ares where that info is readily available on XM. I don't understand how the National association Of Broadcasters can dictate what I can hear on the XM radio that I pay a fee for. I love the variety that I get on my XM radio. I respectfully request that you honor the Free speech right of XM radio to continue doing what they do so well. Please reject the NAB's petition 04-160Thank you,
